**29 March 2010**

**ELEKTRONCEK'S ORGANIC ROULETTE AT FAREHAM ARCADE, UK**

This week one of Interblock's new Organic Roulette Machines was successfully installed on trial at the arcade of Southern City Leisure Ltd in Fareham UK. The Roulette with UK AGC's category C software and 8 play stations is one of the G4 generation of products and has received a very positive response after only a few days of installation. The state of the art gaming machine will stay in the Arcade for testing purposes for three months.

Mr. Benjamin Jecklin, Project Manager of Southern City Leisure Ltd, commented:

"We are convinced that this machine will live up to its expectations once players have become acquainted to such a groundbreaking improvement to the English amusement arcades scene."

"I am very happy that we now have Interblock's Organic Roulette Machine as the centrepiece of our arcade. Every customer who enters is intrigued by this new and awesome machine that is so unlike anything that can be found in any other English arcade. The quality and craftsmanship of the Interblock machine is without a doubt the best we have seen. The machine has low maintenance because of its well thought out design, construction and programming."

After successful testing we are hoping for further cooperation with the Southern City Leisure Company who have twelve other Arcades in the nearby of cities of Southampton and Portsmouth!
