Elektroncek's Organic Twins Roulette installed at magic dice arcade in Belgium

14/06/10

On Thursday, June 3, 2010 the first of Elektroncek's Organic G4 Products was successfully installed at the Magic Dice Arcade of Grobbendonk City in Belgium. The Organic Twins Roulette with 12 play stations has received a very positive response, and has proven to be a refreshing attraction only few minutes after installation. Throughout the final settings and installation players were quite impatient, walking around the machine and eagerly waiting for the first play.

Mr Dirk Nuyts, Director of Bingo Service, further explained:

"We are excited but at the same time not surprised about the players response. The machine looks wonderful and the decision to have the black red design color combination couldn't have been better as suits the arcade perfectly. We are anxiously waiting for the installation of the Player Information Display."

Organic Twins is a multi-game, multi-denomination, multi-player platform. The casino can select between any combination of available games: Roulette (Single Zero or Double Zero), Dice (Craps or Sic Bo), and Video games. The Multigame enabled twins gaming machine offers two mechanical random generators, any desired number of video game units and a player information display all in one single gaming machine.

Mr. Klemen Sitar, Regional Sales Manager, commented:

"This is the first of eight Organic Twin Roulettes with 12 play stations, which will be installed in the Arcades of the Bingo Service Company. It was great to see the player's enthusiasm and even more the way the machine stands out on the gaming floor. I believe no one was left disappointed."
