## Interblock Asia Pacific back in Club 21, Vietnam

28/06/10

On Wednesday, June 16, 2010 the electromechanical roulette, Megastar 08 was successfully installed at the Club 21, Ho Chi Minh City in Vietnam. The Roulette with 8 play stations is one of the third generation of products and it is known for its reliability and robust but elegant design.

Megastar 8 player station is Interblock's most successful product on the market. The Megastar is supported by in-house produced high-tech electronics and software. The carousel structure of the machine often becomes a focal point on the casino floor, adding something new and fresh to the casino floor mix.

Mr. Michael Hu, Regional Sales Manager, Interblock Asia Pacific, commented:

"Club 21 did try a croupier style roulette which was semi automated but they eventually went back to Interblock simply because Interblock is present everywhere in Vietnam and enjoys overwhelming popularity amongst players, so it is fair to say, it is one of the "must have" games in clubs to meet the tastes of regular visitors. Nevertheless the Vietnam market is generally price sensitive."
